BEST WEBINAR EXPERIENCE**

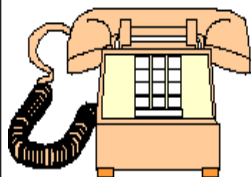

- Ensure Telehealth technology works before the visit. Can the patient see and hear you? What is their internet strength?
- Prepare easy troubleshooting tips for when patients cannot connect.
- During a visit the physician should look professional, be in a secure, quiet room and look directly into the camera.
- Recommend in-office visits for vitals that can't be collected by the patient. What does your "virtual exam" look like?
- Who checks the patient in?
- What is the scheduling process?
- Does the patient have financial share of cost to the Telehealth Visit?
